Retail Pharmacy

**Medical Office Building
60+ Providers &
Specialists**

Dear Community Member,

I am thrilled to announce our Trinity Health Healthcare Campus and Medical District (HCMD) in Minot is celebrating our one-year anniversary. As a member of this incredible region and the President & CEO of Trinity Health, it fills me with immense pride to share this milestone.

Trinity Health's Healthcare Campus and Medical District is home to Trinity Health Hospital and Medical Office Building.

First and foremost, this medical destination is designed to offer you and your family access to state-of-the-art care across the healthcare spectrum. Whether you're in need of a specialist or the latest in diagnostics and treatment options, you'll find that exceptional care is always within reach.

Our HCMD is more than just a healthcare initiative, it's a symbol of progress and our commitment to provide top-notch healthcare to north central and northwestern North Dakota and eastern Montana. This campus reflects our patient-centered care philosophy and integrates seamlessly with our community development efforts, breathing new life into the entire region.

For more than 100 years, Trinity Health has been dedicated to doing our absolute best to improve the health of the people and the communities we serve. We are grateful for your support and donations that help us continue to strive to make even more possible for the lives we continue to touch.

With warm regards,

A handwritten signature in blue ink, appearing to read "John M. Kutch". The signature is fluid and cursive.

John M. Kutch
President & CEO, Trinity Health

Our main entrance atrium welcomes patients and their families with a soaring concourse and comforting touches to put you at ease and create a healing environment for the body, mind and spirit.

Patient-centered and a whole lot more.
**Built with your comfort, healing
and privacy in mind.**

Everything is designed to help you feel better the moment you enter.

Our hospital's new main entrance is designed to offer a warm welcome to patients and their families. It features a grand concourse filled with comforting elements, promoting a positive, healing experience. As you navigate our facility, you'll find it easy to get around with clear signs and wayfinding. Cozy seating areas are also thoughtfully placed throughout the hospital.

Whether you're here for a day or need to stay over night, our patients enjoy a private room with large windows, offering the benefits of natural light.

Your experience will be enhanced through our hub of amenities located around the

hospital's atrium. Our favorite features include The Station Coffee Shop, Town & Country Credit Union financial services, the Trinity Health Auxiliary Gift Shop, the Trinity Health Cafeteria and, most importantly, a spiritual respite dedicated as the Lynn and Denise Billadeau Chapel.

Behind the scenes, we've carefully separated front-of-house and back-of-house functions, ensuring that service operations are kept separate from patient areas.

We've designed our entire facility with your well-being and comfort in mind, making your journey to recovery as smooth and pleasant as possible.

An entire floor dedicated to women's and children's health.

“In our new space, mom and baby stay together, which contributes to healthy mom-baby bonding.”

Danya Brown, RN
Director of Women's and Children's Services

Trinity Health's Family Birth Center brings together labor and delivery, postpartum and the Neonatal Intensive Care Unit (NICU). Pediatrics is also on the third floor to create a comprehensive center for women and children.

Within this space, our 12 private birthing suites, some ready to accommodate twins and triplets, provide the comforts of home combined with expert medical care and technology. Our luxurious, modern suites come with their own bathroom, a flat screen TV and a couch that converts into a bed. A family lounge also is available with a kitchenette and seating areas if families wish to step away from the bedside.

The NICU also features a rooming-in program that allows families to stay overnight in a specially designated room before the baby is discharged. This program supports parents in learning how to care for their newborn with the guidance and support of NICU staff, ensuring a smooth transition to set up families for success once they take their baby home.

When it comes to treating children, our pediatric unit is designed around their needs. Children have their own treatment and therapy rooms — where furniture and decor are kid-friendly and equipment is out of view.

State-of-the-art technologies delivering the latest options.

We can offer more leading treatment options with 12 state-of-the-art operating rooms designed for surgical specialties like cardiology, neurosurgery, orthopedics, general surgery and urology. Each room utilizes advanced monitoring and minimally invasive systems, like the da Vinci Xi System, to help ensure better outcomes. We've also introduced a new cardiac cath lab and interventional radiology suite, excelling in treating strokes, arrhythmias and heart attacks in less time, which ultimately saves lives.

Central to our new hospital design is a commitment to humanizing healthcare. This is evident in our Intensive Care Unit (ICU), with spacious, treatment-ready rooms and designated spaces for families who play a crucial role in recovery.

Our new hospital isn't just a facility, it's our dedication to delivering you more. Here, advanced technology and compassionate care combine to provide a comfortable and healing journey for you and your loved ones.

“ At Trinity Health, we offer advanced medical procedures that patients can receive at some of the nation's best hospitals.”

Jeffrey Verhey, MD
Medical Director of Critical Care Services, Trinity Health First Response Air Medical Team and Chairman of the Trinity Health Foundation Board

Trinity Health Outpatient Pharmacy is located on the first floor of the Medical Office Building. The pharmacy drive-thru is conveniently located off 37th Avenue Southwest for easy access and quick prescription pickup.

The Trinity Health Medical Office Building

With its dedicated entrance, the Trinity Health Medical Office Building is home to over 60 provider and specialist offices, including audiology, cardiology, orthopedics, rheumatology, neurology, urology and women's health. It also houses lab and imaging services, a retail pharmacy and a durable medical equipment store.

We've made the process of seeing a provider here much simpler. Upon entering the lobby, our central registration team is ready to prepare you for your visit with our providers. After checking in, you can proceed to your provider's office. Additionally, being connected to the hospital, your provider has immediate access to all the services our new hospital offers.

24 ER Bays

4 Trauma Rooms

4 Triage Rooms

“Our new emergency department allows us to treat the emergency medical needs of our community while maximizing privacy.”

Samantha Manning, RN
Emergency Department Nurse

An expanded Emergency Department and Level II Trauma Center with highly coordinated and expert care teams.

In a medical emergency, how you respond makes a world of difference.

Our new 33,000 square-foot Emergency Department and Level II Trauma Center is designed to deliver lifesaving care and offer you more comfort and privacy.

We've streamlined our registration process. There are dedicated areas for adults, children and behavioral health patients, making a visit to the trauma center more comfortable.

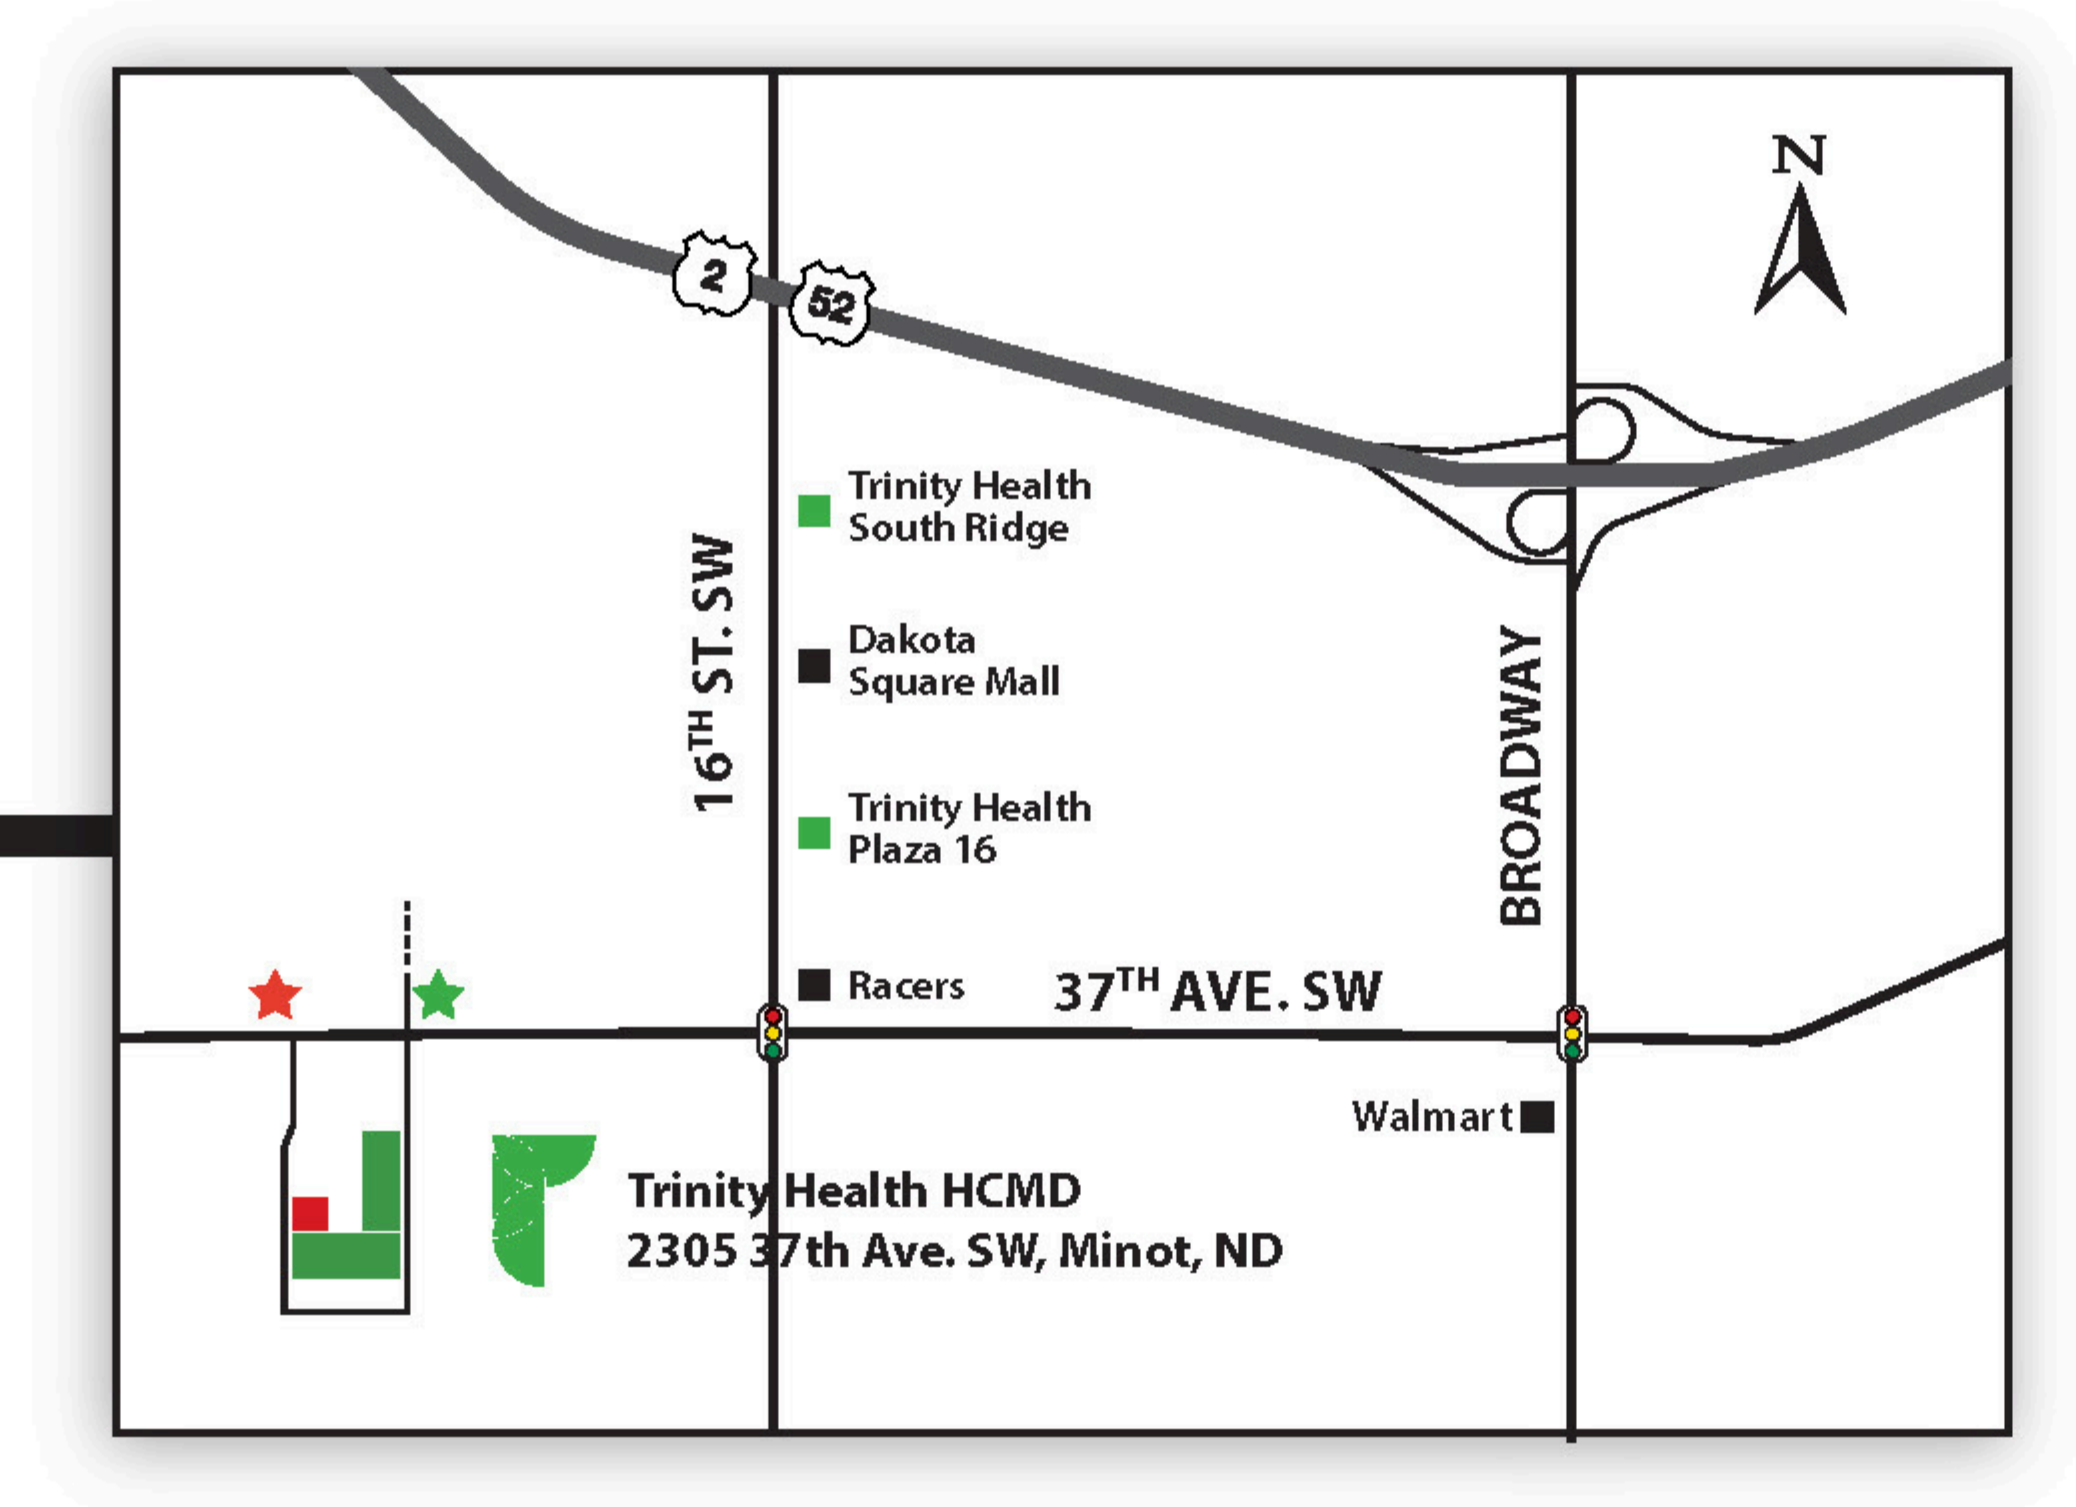

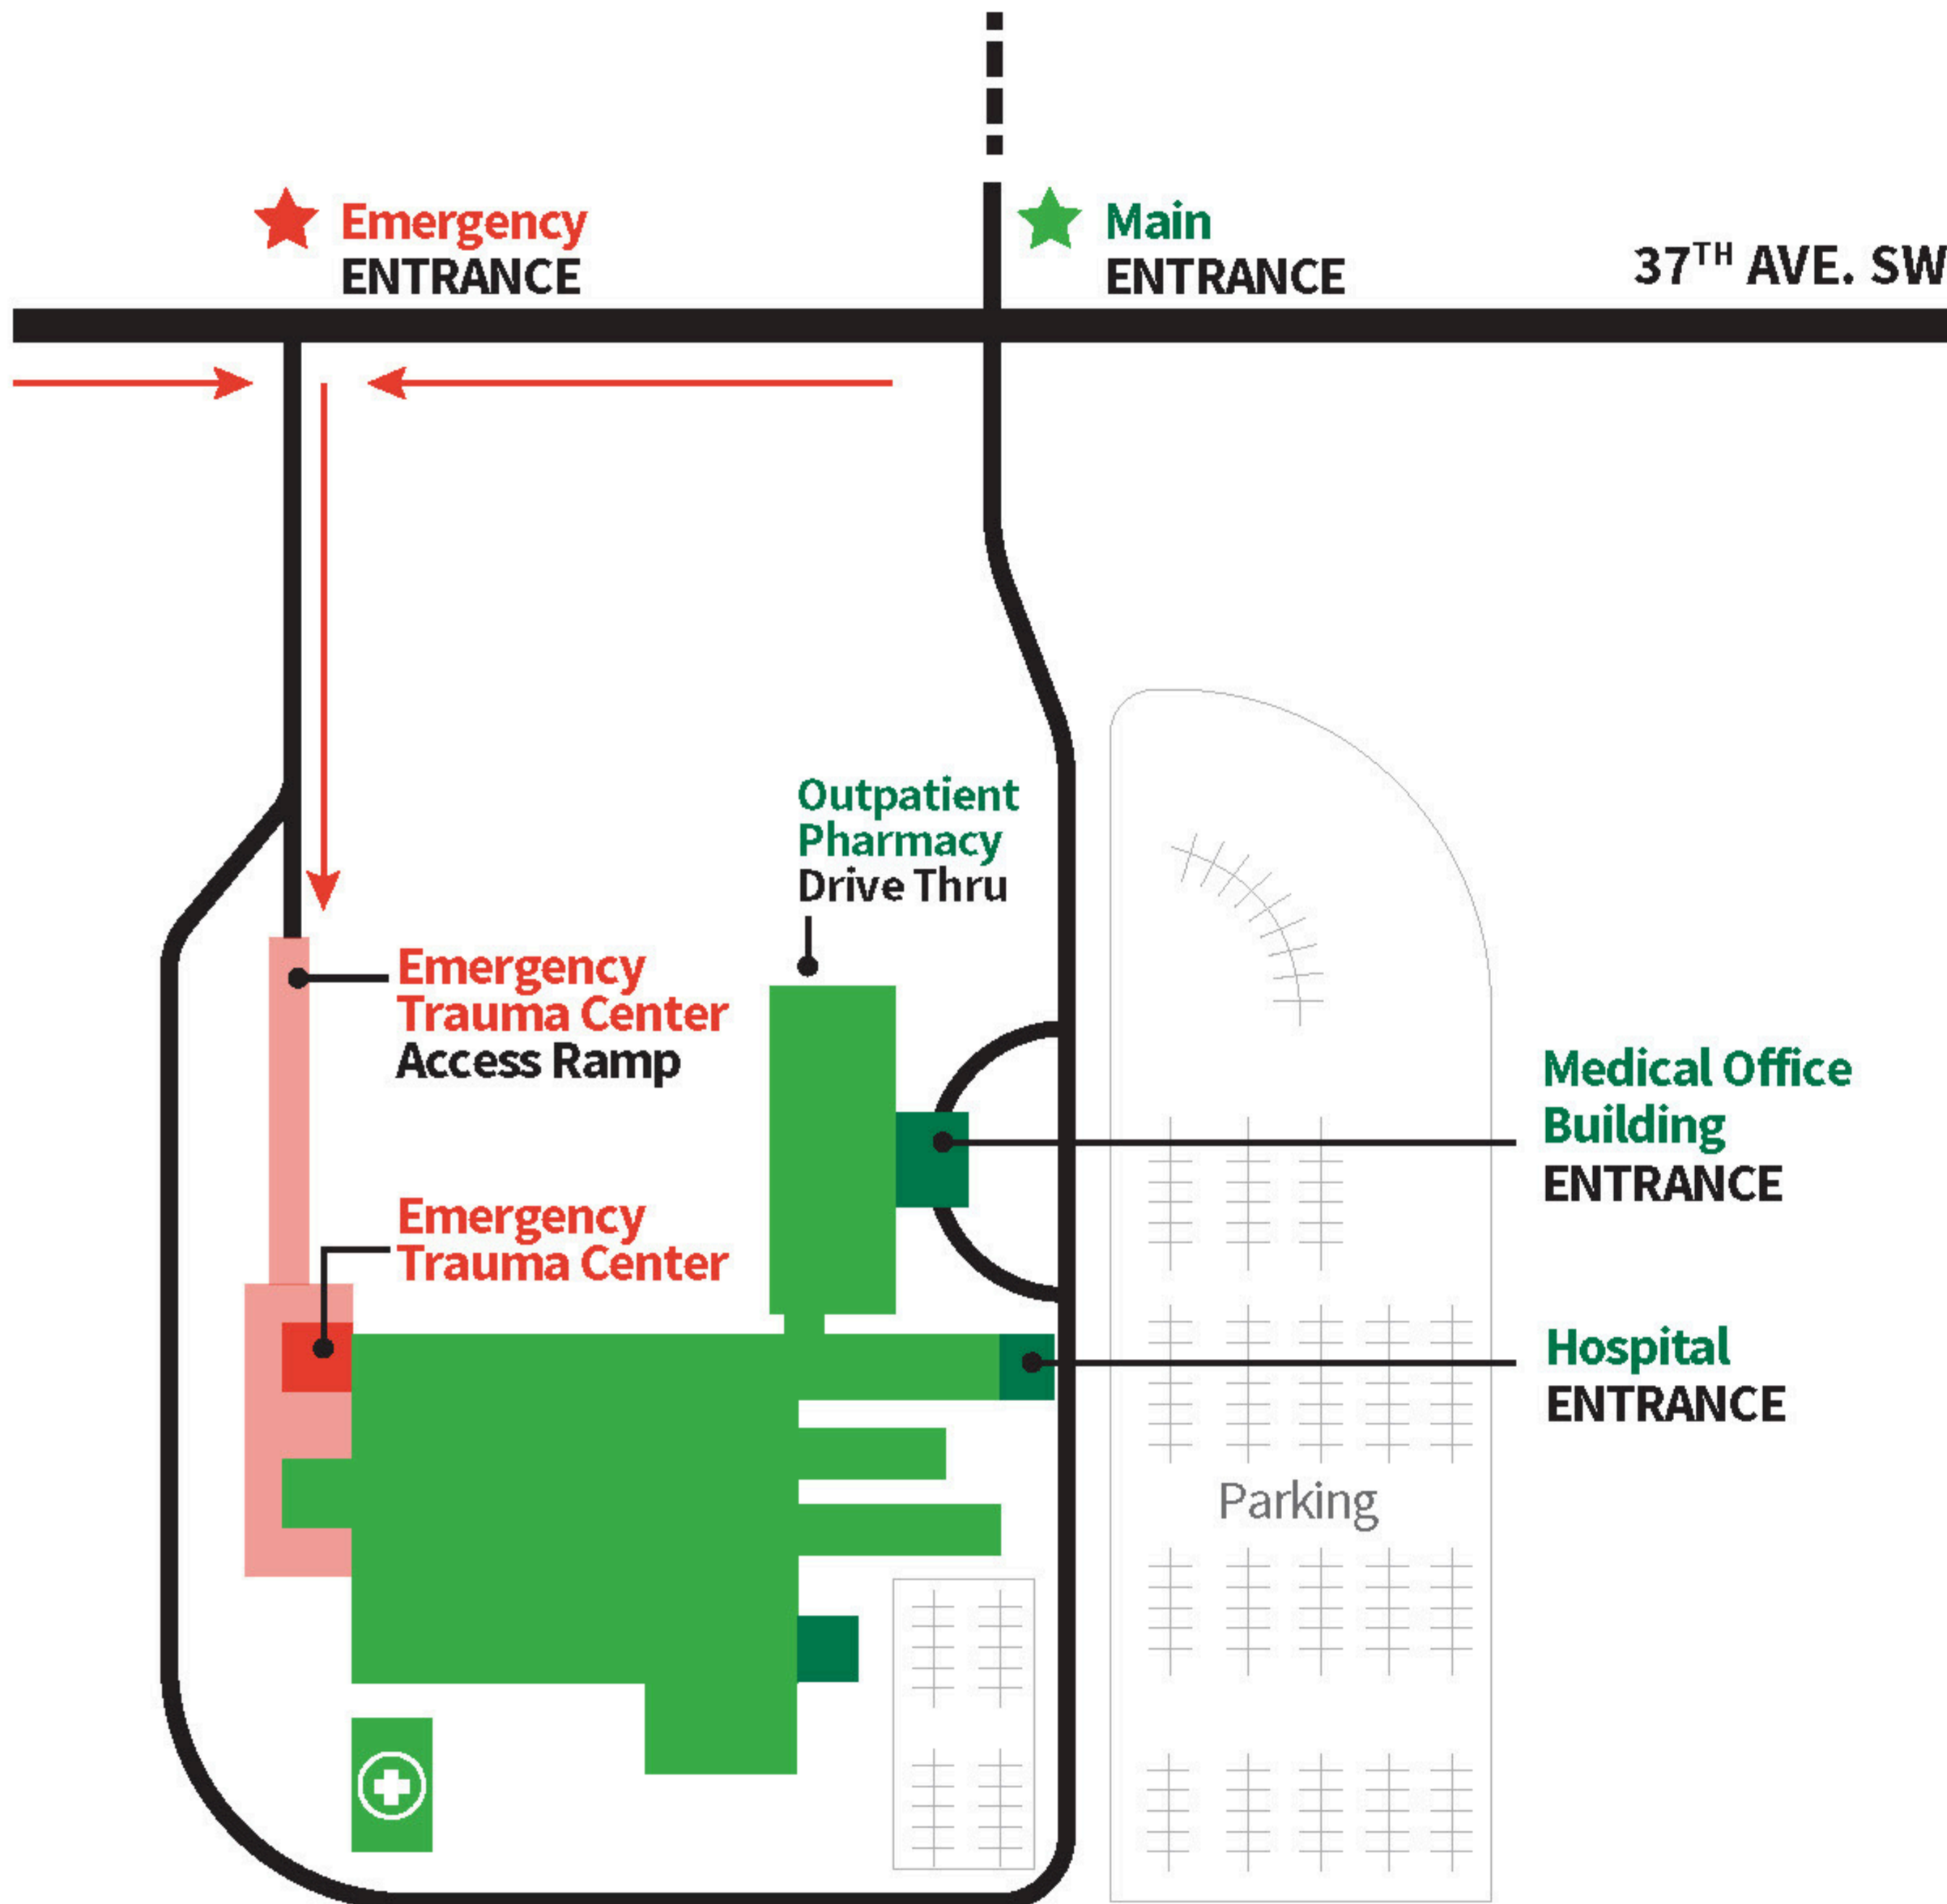

Ambulances now arrive at a dedicated entrance, ensuring that individuals with minor injuries are separated from more critical cases. Radiology, advanced imaging, cath lab, interventional radiology lab and the operating rooms are now located nearby to ensure swifter and more coordinated treatment.

Whether you're a patient or a family member, we've created relaxing seating areas suitable for all ages. All in all, we're bringing a level of care to the region that simply didn't exist until now.

TRINITY
HEALTH

Healthcare Campus and Medical District (HCMD)
2305 37th Ave. SW, Minot, ND

Driving directions to our Emergency Trauma Center

- The ER entrance is 0.1 miles west of the hospital's main entrance.
- Take the ramp up and follow the red signs to the ER doors.
